Skills

Advanced: HTML5, CSS3, Javascript, NodeJS, React, Redux, NPM, Rest APIs, ES6, MongoDB
Proficient: TDD with Mocha, Jest, Enzyme, SQL, Heroku, Travis CI

Recent Projects

K12 Engineering Podcast/ React - NodeJS - SQL

The website for a podcast is for educators, engineers, entrepreneurs, and parents out there who want to instill engineering thinking into young people. Collaborating with web designer and podcast to refine design and database for this website.

Little Mixer / React - Redux - NodeJS - MongoDB - Express

Little Mixer is an app which guides users through the process of planning and throwing a dinner or cocktail party. Given a plan anyone can be a great host.

Experience

Transunion / Operations Analyst **DECEMBER 2016 - PRESENT, AUSTIN, TX**

- Increased Operations team efficiency by assisting with operations team organizational redesign: Streamlining communication between teams, increased transparency, involved operations team members in client engagement beginning at implementation as opposed to 8+ months into implementation
- Managed end-to-end customer experiences for eScan product
- Worked with the customer to increase the value they are receiving from product by identifying issues or roadblocks that prevent them from fully utilizing our products

Apple / Data Analyst **JUNE 2015 - SEPTEMBER 2016, AUSTIN, TX**

- Used French language knowledge to curate business listings in the United States, France, Luxembourg, and French West Africa among other countries.
- Published and reviewed transit incidents to be seen by Apple Maps users
- Assisted in curating support processes and internal "Wiki"
